(360)-286-5645 - hallisky@uw.edu

EDUCATION

University of Washington, Seattle, WA *Expected June 2021*
Prospective B.S. in Bioengineering and Applied Math
- GPA: 3.76/4.0

Bainbridge High School, Bainbridge Island, WA *June 2017*
- GPA: 3.99/4.0
- National AP Scholar, Biomedical Engineering Club Member, Math Club President

---

RELEVANT SKILLS

Lab: Pipetting, titration, chromatography, light microscopy, filtration, spectrophotometry, general dissections, PCR and gel electrophoresis

Languages: Java, R
Experience with Matlab, Python, CSS, HTML, LaTeX

Design: Inventor, Flashprint

EXPERIENCE AND PROJECTS

Undergraduate Researcher, Dey Lab, Fred Hutch
June 2018 – Present
- Filtered through BLAST results of UniRef and target UniProt sequences in Python to identify useful genes matches, and subset metagenomic datasets with these genes
- Explored relationships between bile salt hydrolase genes and relative abundance of various metabolic pathways through model utility tests and correlation tests in R
- Implemented data visualization packages such as ggplot2 for presentation of results
- Presented scientific papers on gastroenterology advancements as well as own research in monthly lab meetings

Infant Hydration Monitor Team, Bioengineers Without Borders, University of Washington
September 2017 – Present
- Discussed and designed numerous prototypes of infant hydration monitor targeted towards low-resource countries in Inventor and tested feasibility via 3D printing
- Worked collaboratively with other subgroups to establish device constraints

Statistical Analysis Intern, IslandWood, Bainbridge Island
July 2017 – August 2017
- Analyzed relationships between race/income and camp attendance across 10 years of demographic data via multivariate analysis, ANOVA, and correlation tests in R
- Recommended solutions to community access problems in final presentation to IslandWood board of education
